

# Advanced ASP.NET AJAX Server Controls For .NET Framework 3.5

Microsoft .NET Development Series  
Supported by the leaders and principal authorities of core Microsoft technologies, this series has an author pool that combines some of the most insightful authors in the industry with the lead software architects and developers at Microsoft and the developer community at large. Don Box Architect, Microsoft This is a great resource for professional .NET developers. It covers all bases, from expert perspective to reference and how-to. Books in this series are essential reading for those who want to judiciously expand their knowledge base and expertise. John Montgomery Principal Group Program Manager, Developer Division, Microsoft This foremost series on .NET contains vital information for developers who need to get the most out of the .NET Framework. Our authors are selected from the key innovators who create the technology and are the most respected practitioners of it. Brad Abrams Group Program Manager, Microsoft ASP.NET AJAX server controls can encapsulate even the most powerful AJAX functionality, helping you build more elegant, maintainable, and scalable applications. This is the first comprehensive, code-rich guide to custom ASP.NET AJAX server controls for experienced ASP.NET developers. Unlike other books on ASP.NET AJAX, this book focuses solely on server control development and reflects the significant improvements in ASP.NET 3.5 AJAX and the latest Visual Studio 2008 features for streamlining AJAX development Adam Calderon and Joel Rumerman first review the core Microsoft AJAX Library and JavaScript techniques needed to support a rich client-side experience. Next, they build upon these techniques showing how to create distributable AJAX-enabled controls that include rich browser-independent JavaScript client-side functionality. The authors thoroughly

explain both the JavaScript and .NET aspects of control development and how these two distinct environments come together to provide a foundation for building a rich user experience using ASP.NET AJAX. Create object-oriented cross-browser JavaScript that supports .NET style classes, interfaces, inheritance, and method overloading Work with components, behaviors, and controls, and learn how they relate to DOM elements Learn Sys.Application and the part it plays in object creation, initialization, and events in the Microsoft AJAX Library Build Extender and Script controls that provide integrated script generation for their corresponding client-side counterparts Localize ASP.NET AJAX controls including client script Discover ASP.NET AJAX client and server communication architecture and the new support for Windows Communication Foundation (WCF) Understand ASP.NET AJAX Application Services Create custom Application Services Design controls for a partial postback environment Understand the AJAX Control Toolkit architecture and the many features it provides Develop highly interactive controls using the AJAX Control Toolkit Understand AJAX Control Toolkit architecture and build controls that utilize the toolkit Foreword xxv Preface xxvii Acknowledgments xxxv About the Authors xxxix Part I: Client Code Chapter 1: Programming with JavaScript 3 Chapter 2: Microsoft AJAX Library Programming 51 Part II: Controls Chapter 3: Components 121 Chapter 4: Sys.Application 169 Chapter 5: Adding Client Capabilities to Server Controls 207 Chapter 6: ASP.NET AJAX Localization 255 Chapter 7: Control Development in a Partial Postback Environment 317 Part III: Communication Chapter 8: ASP.NET AJAX Communication Architecture 371 Chapter 9: Application Services 425 Part IV: AJAX Control Toolkit Chapter 10: ASP.NET AJAX Control Toolkit Architecture 481 Chapter 11: Adding

Client Capabilities to Server Controls  
Using the ASP.NET AJAX Control Toolkit
