

Attribute Grammars and their Applications: International Conference, Paris, France, September 19-21, 1990 (Lecture Notes in Computer Science)

Attribute grammars were introduced over twenty years ago, but they are still not as widely used as could have been hoped initially. This is particularly so in industry, despite their qualities as a specification tool. The aim of this International Workshop on Attribute Grammars and their Applications (WAGA), the first to be entirely devoted to this topic, was to show that they are still the subject of active research and now lead to important, useful and practical applications in various areas. The workshop covered all aspects of attribute grammars, with an emphasis on practical results. This volume includes the text of the three invited talks and 21 submitted papers presented at the workshop. This selection provides a wide view of the diverse research being done in the area. Topics include: - Fundamentals: efficient exhaustive and incremental attribute evaluation methods, parallel evaluation, space optimization, relationships with functional, logic and object-oriented programming, and systems. - Applications: compiler construction, natural language processing, and interactive program manipulation.

Attribute Grammars and Their Applications: International - Google Books Result Find great deals for Lecture Notes in Computer Science: Attribute Grammars and International Workshop WAGA Paris, France, September 19-21, 1990 Attribute Grammars and Their Applications: International Conference Waga Paris,. **Attribute Grammars and their Applications : International Conference** Attribute Grammars and Their Applications: International Conference, Paris, France, September 19-21, 1990 Series: Lecture Notes in Computer Science **Lecture Notes in Computer Science: Attribute Grammars and Their** Find great deals for Attribute Grammars and their Applications : International Conference, Paris, France, September 19-21, 1990 461 (1990, Paperback). **On the complexity of regular-grammars with integer attributes** May 31, 2005 Attribute Grammars and their Applications.
