

Lesser-Bred Stained

Since they began getting each other into and out of trouble at age six, Mike Zimmer and Alex Jackson have been best friends. Now 20-year-old college roommates, they have distinctly different outlooks and personalities, but the friendship remains rock solid. That is, until Alex notices behavior changes in Mike restlessness, eating pounds of food without gaining weight, and a sex drive bordering on insane, even for Mike, the campus stud. When a spring break camping trip takes a bizarre and violent turn, Alex realizes his lifelong friend is a Lesser-Bred a human carrying genes of the Kinthe dragons that inhabit the world in human-shaped bodies right alongside humans. And Mike is starting to Shift, taking on Kin behavior, instincts, and bloodlust. Alex finds himself torn between loyalty and self-preservation, and Mike is torn between dreading life and fearing death. Mikes metamorphosis puts them on separate paths, but leaves them connected in ways they cant fully understand.
