

Web Browser Shortcuts

Learn new shortcuts for Microsoft Internet Explorer, Chrome and Firefox internet browsers and speed up your time surfing the worldwide web at home and at work. Also use Media Player features without fiddling with a small tablet, mouse or laptop mousepad. What are fast access keys or shortcuts? These keys perform a menu, command, or a feature, without you needing to use a mouse on menus and buttons, an example being CTRL+D to add a website to your favorites, or Ctrl+Shift+P to Open a new InPrivate Browsing Tab in IE. Access browser features without using the mouse, avoid unnecessarily searching through menus and toolbars for commands when you can quickly use them through your keyboard. Really helpful if you have a laptop and dont like using the mousepad.
