

Redcoats and Sleigh Bells

It took more than a bullet wound to stop Holly Masters from completing her intelligence mission. Generals, patrols, and experienced scouts had been her sport, until she met Dr. Nicholas Clayton. Severely injured and now his patient, in order to complete her assignment, she must decide if she can kill the man who saved her life. Nicholas has healed wounded men for both the Patriots and the Crown, but he never expected to find a wounded woman, dressed in a British military uniform, on the edge of his property. Tucked into her coat sleeve, she holds many secrets that will change the course of the war. As an officer, Nicholas has a duty to prevent her from leaving his custody. As a doctor, he has the means to prevent her from revealing what she knows. Trained for every action, nothing has prepared him for what he knows he must do.
