

Caterpillar: Modern Earthmoving Marvels

For this book, Frank Raczon dug up the dirt and constructed the only modern history of the worlds heaviest machinery. So many things differentiate the Caterpillar brand from its competitors that it can be difficult to know where to begin. From its trademark Caterpillar Yellow to its tradition of making the most rock-solid products on earth, everything about the Caterpillar name is synonymous with the worlds toughest machines. In fact, the companys success has led to it being used by economists as a bellwether for the state of the economy as a whole. In Caterpillar: Modern Earthmoving Marvels, author Frank Raczon details the largest and most modern earth-moving machines today, with down-to-earth explanations of how and why they work the way they do as well as interviews and quotes from Caterpillars engineers and operators themselves. Featuring rare historical photography and insight from noted industrial historian Keith Haddock, this book offers a glimpse of how the Caterpillars meteoric rise from an under-the-radar producer of agrarian and industrial equipment led to its modern status as an international corporate superstar. Filled with excavators, backhoe loaders, motor-graders, off-highway trucks and more, this book is sure to capture the imagination of anyone who has ever passed a construction site and wondered just how the machines work the way they do and what theyre truly capable of.
