

Children: Rights and Childhood (Ideas)

Children: Rights and Childhood is widely regarded as the first book to offer a detailed philosophical examination of children's rights. Drawing on a wide variety of sources from law and literature to politics and psychology, David Archard provides a clear and accessible introduction to a topic that has assumed increasing relevance since the book's first publication. Divided clearly into three parts, Children: Rights and Childhood covers key topics such as: John Locke's writings on children, Philippe Ariès' Centuries of Childhood, key texts on children's liberation and rights, a child's right to vote and to sexual choice, the rights of parents and the state over children, defining and understanding child abuse. The second edition has been fully revised and updated, including a new preface, a new chapter on children's moral and legal rights, taking into account the United Nations Convention on the Rights of the Child.
