

Dior: New Looks

Christian Dior achieved immortality with his first collection in 1947. His New Look amazed the world as it emerged after wartime austerity, and reset the boundaries of modern elegance. Diors search for the perfect line and the ideal silhouette has been celebrated by couturiers of the first rank: Yves Saint Laurent, Marc Bohan, Gianfranco Ferré, John Galiano have all made their distinctive contribution. Now Raf Simons has made his mark with emphatic reference to the Houses history. This book honours Diors influence by celebrating the elements of style for every generation since 1947, through inspired pairings of classic and contemporary photographs. Six thematic chapters express outstanding Dior characteristics, including the silhouette, the evening gown and the eternal muse - in short, the aspects of the House that lend it unique distinction both then and now. The most beautiful fashion plates from Diors own time sit beside examples of the houses creations through the decades, including the latest by current designer-in-chief, Raf Simons. The resonance between classic archive photographs and the latest most up-to-date frames is clear and compelling.
