

# Cloud, Grid and High Performance Computing: Emerging Applications

Continuing to stretch the boundaries of computing and the types of problems computers can solve, high performance, cloud, grid computing have emerged to address increasingly advanced issues by combining resources. Cloud, Grid and High Performance Computing: Emerging Applications offers new and established perspectives on architectures, services and the resulting impact of emerging computing technologies. Intended for professionals and researchers, this publication furthers investigation of practical and theoretical issues in the related fields of grid, cloud, and high performance computing.
