

The Business Case for E-Learning (Network Business)

Realize productivity gains from network-driven communication, training, and assessment. What sets apart The Business Case for E-Learning? Unified approach to e-learning. Covering knowledge sharing, training, and assessment. E-learning components such as online testing and certifications are uniquely combined. Productivity. The cause for rather than a consequence of e-learning. The Business Case for E-Learning demonstrates cases and methods in e-learning to those seeking productivity advantages for their organizations and ecosystems. Focus on ecosystem. Those seeking productivity advantages across the entire supply chain or value chain of delivery can benefit from the presented perspective.

Recommendations go beyond organizational gains to cover resellers and customers. Results and returns. See case studies and empirical evidence of the value and return on investment (ROI) that demonstrate the success of a cohesive e-learning program. Learn how Cisco Systems saved \$142 million in one year using e-learning. I have always truly believed that the Internet and education are the two great equalizers in life, and this book provides information about how to combine the two for productivity and profitability gains, based on real successes. -John Chambers, President and CEO of Cisco Systems The Business Case for E-Learning is the first book that demonstrates the productivity gains provided by Internet learning through a unique approach combining e-communication, e-training, and e-assessment. Beyond theory, The Business Case for E-Learning is based on practical experience in developing and deploying programs that bolster profitability. This book offers you practical recommendations for best practices and return on investment and provides lessons learned from

real-world experiences. The Business Case for E-Learning presents several case studies that range from the challenges of learning in Africa to the emergence of corporate knowledge-sharing communities. Case studies on Toyota, BearingPoint, Element K, and other e-learning leaders demonstrate how e-learning best practices can yield value for any organization. One case study quantifies how Cisco Systems in one year generated \$16 in value for every dollar spent on an e-learning program. Managers need to prove to companies that an e-learning program can result in demonstrable productivity gains. Through The Business Case for E-Learning, you learn to avoid unnecessary trial and error with e-learning and take advantage of the e-learning experience documented by authors Tom Kelly and Nader Nanjiani. You can visit the companion website for The Business Case for E-Learning at www.cisco.com/go/book/elearning. This volume is in the Network Business Series offered by Cisco Press. Books in this series provide IT executives, decision makers, and networking professionals with pertinent information about today's most important technologies and business strategies.
