

Discovery Management: Further Analysis of the Civil Justice Reform Act, Evaluation Data (Rand Corporation//Rand Monograph Report)

The Civil Justice Reform Act of 1990 (CJRA) required that each federal district court develop a case management plan to reduce costs and delay. The legislation also created a pilot program to test six principles of case management and required an independent evaluation to assess their effects. After the main evaluation report was completed, the Advisory Committee on Civil Rules of the Judicial Conference of the United States asked RAND to conduct further analyses of the CJRA evaluation data to see if additional light could be shed on discovery management.
