

How to Avoid Spending \$\$\$ on an Attorney, for your Accident Injury Claim: Successfully Settle Your Own Injury Claim for Top Money

Many people are involved in accident injury cases every year. Most do not want to spend money for an attorney, but feel they should because they may not understand how insurance companies work, or how they settle claims. This need not be the case any more. This book is a vital, detailed guide that goes into every aspect of an injury claim and how they are evaluated, regardless of the facts of the case. This book covers all injury claims and even workers compensation claims. (Many people have BOTH types of claims at once, but do not know it. This book not only tells you about each, but also how to work both of them successfully at the same time, so that there are TWO settlements) This book covers all important aspects of injury claims: including medical treatment; compiling, filing and negotiating settlement demands [and includes a complete sample section in the Appendix with numerous guides and examples]; as well as important post settlement issues -- such as subrogation and reducing medical billings. These topics are often ignored by other books, or even attorneys handling cases, since they only get paid on the overall settlement amount, not how much a client actually nets. INJURED PARTIES, however, are VERY interested in how much they actually net -- or walk away with -- from the overall settlement amount. This book not only teaches how to get the best settlement possible, but also how to KEEP more of that settlement; so that you walk away with the maximum amount possible. There are numerous strategies, techniques and tips for maximizing your settlement. This book makes a wonderful gift, and is an excellent reference tool for any office or home library. If you are going to settle your own case, or may in the future, AND YOU WANT TO KNOW EVERYTHING THERE IS ABOUT THIS SUBJECT, including how insurance companies work, this is the book for you.

An absolute steal at this price!
