

Emerging Fashion Designers 2

This eye-catching second edition picks up where the first left off, spotlighting garments and illustrations for eveningwear, menswear, childrens wear, sportswear, and more. Included is a collection of bright and original designs by 60 recent graduates from 12 premier fashion design programs in the United States. The wide range of work in this anthology is augmented with a brief dossier on each young designer, including inspiration and materials. These dossiers provide deeper insight into the choices these up-and-coming designers are making when they create their trendsetting garments. This easy to navigate resource has garments organized alphabetically by designer and indexed graphically by school. It is an essential reference to the newest talent and trends in fashion. For anyone fascinated with the fashion industry and fashion trends, this book the second in a growing series is required reading!
