

## Essential CSS and DHTML for Web Professionals (2nd Edition)

95% of all Web users now have CSS/DHTML compatible browsers. Now's the time to leverage these technologies to build sites that load faster, look hotter, and work better! In this fully updated best-seller, two renowned Web developers help you master CSS and DHTML -- hands-on! Learn how to use CSS and DHTML to build real-world sites that sell products, educate visitors, display ads, present quizzes, and deliver sophisticated interactivity. The book begins by introducing the fundamentals of CSS style sheets, including the STYLE Tags; Z-Index stacking; and more. The authors demonstrate how to add DHTML-based interactivity; build pop-ups for search and secondary navigation; create splash screens; and much more. The book also includes practical solutions for reliable cross-browser coding. All finished sample sites and applications are on the Web -- so developers can reuse the code, and see exactly how their pages should look and work.
