

Famous Sculptors and Sculpture (Classic Reprint)

Excerpt from Famous Sculptors and Sculpture The aim of this work is to give in a condensed form such authentic knowledge of the great sculptors of ancient and modern times as can be obtained, and a description of the masterpieces of sculpture now existing. The record commences with the dawning of the best period of Greek and Roman art, giving an account of the most celebrated sculptors and their works to the decline of classic art. Commencing again with the revival of art in Italy, as shown in the works of Niccola Pisano, who flourished in the early part of the thirteenth century, and who is honored as the father of modern sculpture, it extends to the present time, not, however, including living sculptors. Much valuable information concerning the history of Italian art has, during the last few years, been gained through the examination and publication of documents hitherto unknown, or unsearched.
