

## Objections Sustained: Subversive Essays on Evolution, Law and Culture

Phillip Johnson has been called our ages clearest thinker on evolution and the principal lay critic of Darwinism. And indeed some of his most persuasive writing has been penned in opposition to the most powerful sacred cow of modern secularism. Here, available in paperback for the first time, are collected several of Johnsons pithiest essays attacking the idolatry of Darwin. But here also are his stimulating thoughts on a wide variety of other topics, including scientists who popularize, religious freedom, American pragmatism, Paul Feyerabend, Winston Churchill, postmodernism and natural law.
