

# Build Your Own Home Network

-- Build Your Own Home Network is a low-cost, build-it-yourself, highly visual guide to creating a home network under a peer-to-peer and Ethernet hookup. It covers all the costs and equipment necessary for easy setup and use.-- Includes more than 100 photographs! Photo after photo teaches the reader step-by-step how to set up and configure their network.-- Includes complete coverage of peer-to-peer networking, Windows 98, Ethernet and wireless topics.-- Visual Glossary covers basic networking hardware for easy identification.-- Author, Ron Gilster, is a big name and draw in the hardware market.
