

Perl, Cgi, and Javascript Complete

Perl was originally created as a programming tool for Unix, but the emergence of the Web has thrust Perl into the mainstream. Perl 5 has become the language of choice for creating CGI scripts to add interactivity to Web sites. JavaScript is Netscape's popular scripting language for building interactive Web applications and is often used in combination with Perl.

Perl, CGI, and JavaScript Complete, 2nd Edition: Dave Evans, Greg Hello, I'm quite new to perl, and my question is this: I have a perl script I need to execute at I hope it is complete enough to at least give you an idea. do javascript stuff here = CGI_URL + idlookup.pl form.submit() // executes **JavaScript and Perl Subroutine - PerlMonks** Sybex Inc, Perl, Cgi, and Javascript Complete, Sybex Inc.
