

Scientific Jury Selection (H) (Law and Public Policy)

Given the importance of trial consultants to the modern day practice of law, Scientific Jury Selection is designed to be informative for psychologists, other professionals interested in trial consulting (e.g., sociologists, communication experts, marketing researchers, psychiatrists, and social workers), and attorneys. The authors provide a thorough review of the most common techniques used to select jurors, and a critical evaluation of the ultimate effectiveness of these methods. This critique is based upon an examination of the social science literature. Psychologists and other social scientists as well as practicing trial consultants who read the book should gain a better understanding of the current state of research relevant to scientific jury selection, and areas where new research needs to be conducted to advance the field. Attorneys who read the book should be better able to decide whether or not to hire consultants to assist in future litigation, and if so, what types of services these consultants should provide.
