

## Mark Zuckerberg: The Face Behind Facebook and Social Networking (Titans of Fortune)

Fourth Edition (Includes IPO, Wedding and post-IPO through December 2012) Mark Zuckerberg, the 28-year-old founder of Facebook, is not only the youngest self-made billionaire in history, he was worth \$19.1 billion right after Facebook's initial public offering. Although his meteoric rise has lost some of its luster after the IPO, he is still considered by many to be one of the most influential persons in the information age. His impact on American culture is virtually unprecedented. And the company he controls so carefully, Facebook, has become a major social, commercial and advertising international force. The 2010 film, Social Network did not portray him in the kindest light, but was it a work of fact or fiction? Separating fiction from fact, award-winning author Daniel Alef, tells the true story of Zuckerberg's meteoric rise and his indelible mark on the evolution of American culture through social networking and now advertising. The curly-haired wunderkind rubs elbows with Bill Gates, Warren Buffett, Rupert Murdoch, Donald Graham and other prominent players in today's business, technological, and media world and is an emerging philanthropist. Alef's story includes a timeline, further reading section, shareholder breakdown, video links to various Zuckerberg interviews, and the final S-1 Registration Statement and Prospectus for the IPO.
