

# Microsoft Project Server 2010 for Enterprise Project Management

Microsoft Project Server 2010 for Enterprise Project Management was written for project managers / project planners who are responsible for developing and maintaining projects and programs using either Microsoft Project Professional 2010 connected to Project Server 2010 or Project Web App (PWA). The book explains the Project Server administrative options that control the actions that project manager can and cannot take when using Project Server 2010. It also covers Project Servers Project and Portfolio Management (PPM) and Business Intelligence (BI) capabilities.
