

NLXL

Large format and super thick book with 350 artistic aerial photographs of the Netherlands, interspersed with text contributions from sixteen famous Dutch celebrities. The photos show the Netherlands as a rigidly organized, manicured country where even the breakers yards seem neat and tidy. Ditches, roads, dykes and lakes form the contours of the photo compositions, in which man also plays a role. The photographs are pinpoint sharp, with a strong color construction. The photos are, without exception, remarkable and are captured in a clear, logical lay-out. Captions are handily arranged at the back of the book in rows of photo blocks. This book, weighing 4.3 kilograms, is a masterpiece by the photographer and a wonderful attention getter.
