From the Foreword by Scott Stulberg Watching Karen Sperling explain the inner workings of Corel Painter to us in our little get-togethers was like hanging out with Michelangelo explaining how he chisels away at his sculptures. For me, I dont think there is anyone on earth who understands this program better or is more talented with using Painter than Karen. I love seeing the finished pieces of work she does with my photographs as they are absolutely stunning and I wish I had just a little of the talent she has with this program. I really cannot say enough about what an amazing job Karen did with Painting for Photographers Volume 2 as it is so easy to follow and shows so many different variations to create paintings from

photographs. Each chapter is unique and can turn anyone into an artist! Karen really is a magician and I know that no one else can really explain the intricacies of this unbelievable painting program like Karen. As an author myself, I know what goes into making books and I know that this new book from Karen is going to be an absolute winner. Cover painting and design by Karen Sperling based on a photo by Scott Stulberg.
