

WordPress Security Wizard: Lock Down Your WordPress Site From Hackers! (Biz Mastery Series: WordPress Book 2)

ATTENTION ALL WORDPRESS USERS! IS YOUR SITE SECURE FROM HACKERS? In today's online environment, hacking is becoming more and more common. If you read about the big companies being hacked like Anthem, Home Depot, and others, you will know that it is extremely important that your own website be as secure as possible from hacking attempts. Unfortunately, most WordPress website owners don't pay attention to the security of their sites. And this can be very dangerous. Not only can you lose access to your site, but the hackers can steal your content (or delete it), your products, your customers, and your revenue. They can also damage your good reputation, which could cause more than just financial damage. Lucky for you most hackers are lazy. They look for easy targets. Don't let your site be an easy target!

Thankfully, there are certain procedures you can perform on your WordPress site to help keep it secure. Nothing is 100% effective, but most of the time the hackers are just looking for an easy way in, so you want to make sure there isn't one. For this book, I'll be explaining the urgency of getting your WordPress sites locked down. With hacking on the rise, everyone is at risk. Next I'll be showing you specific things you can do right now which will protect your site from hackers and others trying to get access to your website. With just an hour of your time, your websites can be ten times more secure than the average WordPress site. I show you how with simple step-by-step instructions that anyone can follow. Don't waste any more time! Secure your sites today and rest easy tonight.
