

Computer Aided Radar Performance Evaluation Tool: Radar Performance Analysis, One Diskette and Users Manual (Artech House Radar Library)

This comprehensive computer application, an easy-to-use computer tool for the assessment and design of surface-based (maritime and land-based) radars, simplifies the complex task of designing and evaluating surface-based radar systems. In order to achieve a radar system that is both efficient and cost-effective, it is necessary to conduct a detailed analysis of the radar/environment/target chain. The software package is comprised of a 3.5 diskette with manual.
