

September Songs: The Good News About Marriage in the Later Years

Since the beginning of the twentieth century, thirty years have been added to the normal human life expectancy. In *September Songs*, the follow-up to her bestselling *Intimate Partners*, Maggie Scarf investigates the surprising and profound evolution marriage has undergone in these "bonus years." In a series of intimate and provocative interviews, she delves into the lives of couples married for more than two decades and uncovers the welcome news that most couples are more satisfied in their marriages today than in their early years together. By giving voice to both their struggles and their triumphs, these husbands and wives reveal how they've balanced their emotional and physical needs with those of their partners, and how the lessons they've learned over time have helped them find new opportunities to love, cherish, and live alongside each other in the extra years they have together.
