

## A VISUAL COURSE OF MODELLING TECHNIQUES: 170 pictures showing how to model bas-reliefs and high-reliefs

A VISUAL COURSE OF MODELLING TECHNIQUES This is the first in a series of visual courses in which I will share my long experience as a sculptor and designer with my readers. Through 170 photos and 4 practical exercises you will discover the techniques and procedures for making bas-reliefs and high-reliefs. The pictures will help you carry out your work step by step: they show the proper positions and moves of the hands and tools in modelling. The text also has a lot of technical information about clay and tools. The course starts with a simple practice exercise and ends up with more complex assignments like modelling human figures and portraits. You can find information about my works at [www.fabriziosavi.com](http://www.fabriziosavi.com)
