

## Military Railways

The subject of military railroads as here treated will include the location, construction, operation, and maintenance of railroads in the theater of war under military auspices and for military purposes; that is, with a personnel consisting of officers, enlisted men, and civilian employees, and for the main purpose of facilitating the movements and supply of the Army. The difference between war and peace conditions will cause a wide departure of military from civil railroad practice. 1916. 191 pages.
